Art Unit 1205

The papers filed August 30, 1993 have been received and entered into the file.

To clarify the restriction requirement the following restriction is incorporated herein:

This application contains claims directed to the following patentably distinct species of the claimed invention: phosphorous compounds classified in Class 252, subclass 174.16; furyl classified in Class 549, subclass 505; piperidines classified in Class 546, subclass 184; epoxy classified in Class 549, subclass 512; piperazine classified in Class 544, subclass 358; pyrroles classified in Class 548, subclass 400+; pyrazoles classified in Class 546, subclass 26+; and triazoles classified.

Applicant is required under 35 U.S.C. § 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claim 1 is generic.

Art Unit 1205

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

M.P.E.P. § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.

Applicants, if they desire, may submit a claim which would further clarify the restriction requirement.

A further restriction may be required.
